

Tools for placing seeds

(besides patience!)

The traditional method is to use a toothpick with a little glue on the tip to pick up seeds, one at a time.

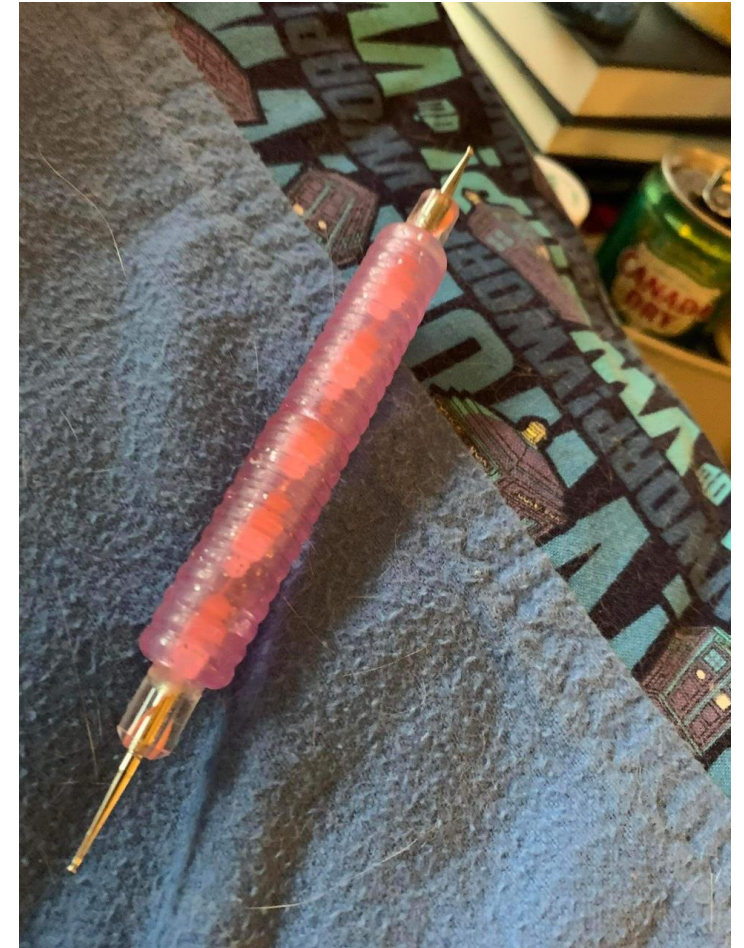

Minnesota State Fair Crop Art : A Talk with Linda Paulsen

Other recommendations from the crop artist community

Embossing stylus tools

May want to cut off rounded tip and/or add soft pencil grips to the handles.

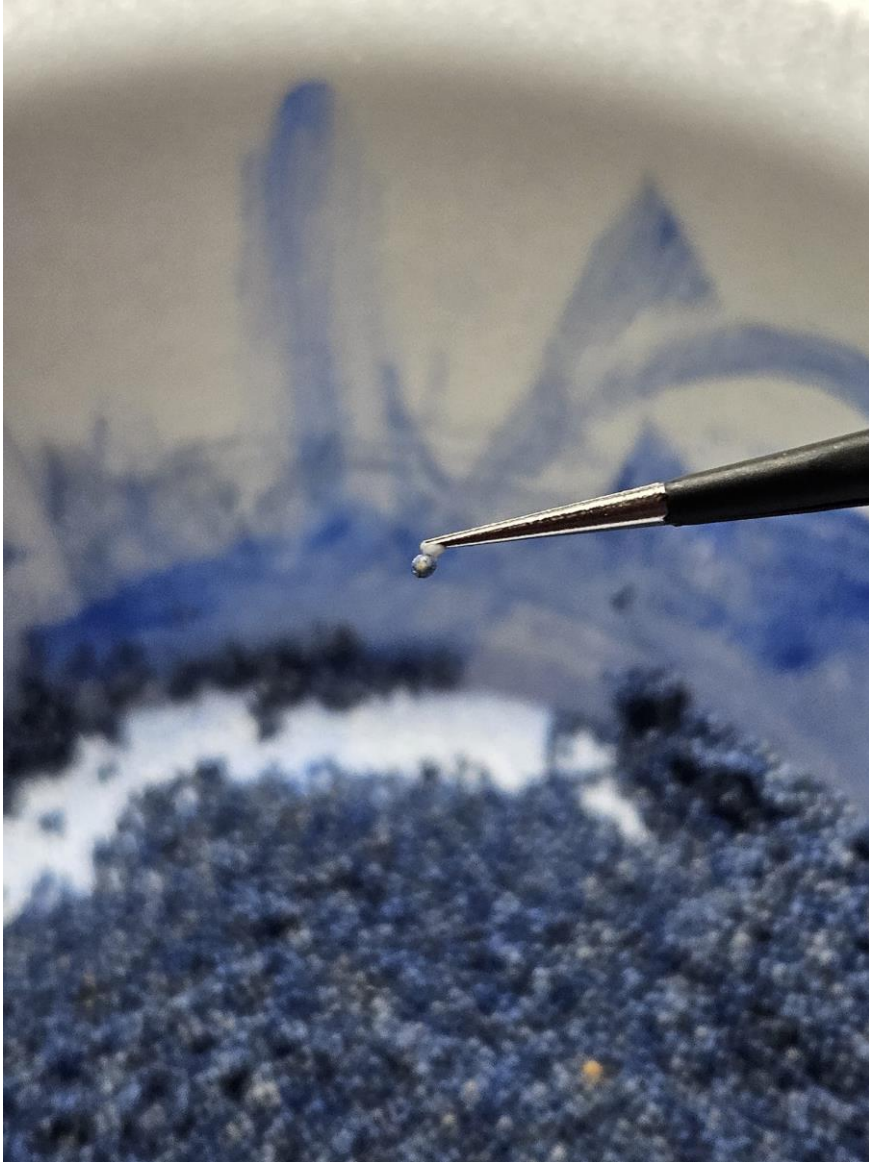

Alisa June's stylus with pencil grips

Clay sculpting tools

Lab dissecting probes

Needle-nose tweezers

Wax pencils used for 'diamond' art

All of these tools can be purchased at your local art or craft store or online (or even your grocery store, in the case of toothpicks).

Experiment and see what works for you!
